Look Out When Bicycling, Walking, Driving

Understanding how North Texans bicycling, walking and driving should interact together is important to improving safety on area roads.

When Bicycling Follow the same traffic rules as vehicles and use hand signals to notify others of maneuvers.

When Walking Be alert, visible and cross streets at crosswalks.

When Driving Always allow at least three feet when passing someone on a bicycle and yield to people walking.

Visit LookOutTexans.org for more tips to keep families and friends safe.
